

# SHARE THE LOVE OF READING

From birth children are constantly learning. Early years in life are the foundation for growth and development. Incorporating a reading program into your practice can improve the reading ability of children and thereby instill lifelong benefits.

**CHALLENGE:** Adults are to read and record 100 books in a three month time frame to a child under five years of age. Each time a book is read, record it by coloring in one heart. For each 100 books read and recorded between 2/7/2010 and 4/7/2010, your name will be entered into a raffle for a prize.
